Epson **EB-X14H**

DATASHEET

KEY FEATURES

- 3,000 lumens White and Colour Light Output
- 3,000:1 contrast ratio
- No quality compromise, on a budget
- Direct power on/off and instant-off
- Built-in security features

Make your budget go further with this XGA projector that delivers a super-bright picture. Ideal for installation use, a series of user-friendly features make the EB-X14H easy to set up and use.

Amaze your audience with the very high White and Colour Light Output of 3,000 lumens. This enables you to present even in a bright room while the 3000:1 contrast ratio and 16.77 million full colour reproduction guarantees sharp detail. Capture the attention of your audience by using the optional Epson visualisers and their advanced software, to give a close-up view of documents and 3D objects, eliminating the need for photocopies.

This affordable projector has many features usually found on more expensive models. A long lamp life of 5,000 hours (in eco mode) keeps running costs low. Sleep and eco modes, in addition to easy lamp replacement, mean that this projector is both energy efficient and easy to maintain.

The projector is compact and lightweight with a modern design*1, for easy installation use. With a short throw distance, this projector can produce large screen sizes from a short distance, with a 67-inch screen size from a distance of just 2m. In addition, the projector will automatically detect and match the aspect ratio of the input source, with a source search function to automatically project inputs when they are connected.

Security is no longer an issue, as a button lock, password lock, Kensington lock, and security bar are in place to protect the projector from unauthorised use.
